- **Languages:** Java, JavaScript, HTML, CSS, SQL
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Frameworks:** ReactJS, NodeJS, ExpressJS, Tailwind CSS
- **Developer Tools :** Git, GitHub, Postman

PROJECTS

DreamJob | Job Search Application with email Automation Aug,2024

- Developed using MongoDB, Express.js, React.js, and Node.js.
- Integrated email automation to send job notifications to users.
- Implemented a job search feature with filtering and search keyword functionality.
- Ensured secure user authentication and authorization using JWT.
- Utilized REST APIs for communication between the client side and server side.

AiChatSphere | AI-enabled collaboration and communication Application Jan,2025

- Built an AI-enabled application leveraging MERN Stack.
- Incorporated Google Gemini API for AI-based features.
- Enabled users to interact with AI by giving prompts using @ai in chat.
- Used Redis for fast authentication and authorization.
- Implemented real-time chat functionality using WebSockets and code execution using Web Containers.
- Utilized REST APIs for communication between the client side and server side.

ACHIEVEMENTS AND CERTIFICATES

- Solved **100+** problems on [LeetCode](https://leetcode.com).
- Certified in basic problem solving
- Certified in SQL language
- Achieved **AIR 398** in NIMCET 2023 out of 25,000+ participants.
